Summary

I'm a BE Computer Science graduate and diploma holder who loves turning good ideas into great apps. I am Highly Motivated Problem-solver, I have Experience in creating Mobile application, web apps and backend application also I worked as freelance digital consultant.

Education

Anna University <i>Bachelor of Science in Computer Science</i>	2023 - 2026 Erode, TN
--	--------------------------

State Board of Technical Education <i>Bachelor of Science in Computer Science (GPA: 7.1)</i>	2018 - 2021 Valanchery, KL
--	-------------------------------

Experience

Freelance <i>FullStack</i>	Jan 2021 – May 2023 Remote
--------------------------------------	-------------------------------

- Developed and delivered multiple Android application and spring boot application for Client.
- Designed and Integrated RESTful API using SpringBoot and Firebase to Support Scalable and Reliable backend system.
- Optimized application performance by improving database queries, reduce latency, and enhance UI responsiveness.
- Integrated third-party services such as PDF generation. Excel import/export and printer configuration.

Freelance <i>Freelance Digital Consultant</i>	May 2025 – present Remote
---	------------------------------

- Designed and developed high-converting landing pages using modern web technologies, improving client lead generation and online presence.
- Created engaging visual content and marketing creatives using Canva, including posters, social media posts, and brand assets aligned with client identity.
- Designed intuitive UI/UX for web and mobile applications Using Stitch, focusing on user-centered design principles to enhance usability and user retention.
- Developed and contributed to web and mobile applications, integrating frontend interfaces functional and scalable solutions.
- Managed and grew social media accounts for multiple clients, handling content strategy, posting schedules, and audience interaction.

Projects

Vansale | SpringBoot

- Designed and implemented RESTful APIs for order processing, inventory, and customer management.
- Optimized MySQL queries and backend performance for handling large transactional data.
- Implemented secure API communication and validation for reliable data exchange.

Driveway | Fullstack

- Delivered an end-to-end Dealership ERP tracking the full lifecycle of vehicles, rentals, and workshop maintenance.
- Designed a precise conflict-resolution system to prevent double-booking of vehicles across concurrent contracts.
- Streamlined billing by aggregating manual and automated rent data into a unified, one-click PDF export system.

SynApp | React JS, SpringBoot, MSSQL, MySQL

- Solved Data Isolation Problems: Created a tool that connects two completely different database systems (MSSQL Server and MySQL) so they can share information seamlessly.
- Automated Manual Work: Built a system that automatically adapts to changes in the database structure, reducing the need for manual code updates.
- Delivered a Complete Solution: Combined a modern front-end UI with a reliable backend server to provide a complete, easy-to-use tool for database administrators.

Technical Skills

Languages: JAVA, C++, JavaScript

Technologies: React.js, SpringBoot, AndroidSDK, MySQL, Tailwind CSS, SQL Server (MSSQL)

Backend: RESTful API Development, API Integration, Authentication (JWT), Client-Server Architecture

Tools and Platforms: Git, Github, AntigraVity, Cursor, VS Code, Android Studio, Google's Stich, Figma, Canva

Concepts: Prompt Engineering, Generative AI, Object-Oriented Programming, Data Structures
